Asbestos

Manufacturer Declaration of Conformity

Although asbestos is usually associated with construction, heavy industry and shipbuilding, many companies have also incorporated this substance into common household items. The naturally occurring mineral is heat-resistant, cheap and easy to work with. When materials containing asbestos are damaged, fibers can be released into the air. When these fibers are inhaled, they can cause serious illness. Due to that, it is in our interest to dispense with materials containing asbestos

Traco Electronic AG (TRACO) hereby declares that all TRACO POWER products do not contain asbestos.

TRACO does not directly purchase any asbestos.

TRACO POWER products have been manufactured without the intentional use of asbestos.

TRACO has processes and procedures in place to ensure that our suppliers meet our expectations. We have communicated our requirements to our suppliers to ensure that asbestos is not used in our products. We have subsequently obtained declarations from our suppliers confirming their commitment and upstream due diligence.

TRACO is diligently working to ensure that our supply chain is and remains free of asbestos. Please contact us if you have any further questions about our program.

A handwritten signature in blue ink, appearing to read "J. Schaffhauser".
