The TPP 180-M is series of encased AC/DC power supplies coming in an encased package. They feature a reinforced double I/O isolation (4000 VAC) system according to latest medical safety standards (60601-1 3rd edition, 2 x MOPP). The leakage current is below 100 μ A and makes the units suitable for BF (body floating) applications. The excellent efficiency of up to 94% allows a high power-density and compact design (3.6" x 2.44"). The operating temperature range is -40°C to +85°C with derating above 50°C. In natural convection operation these power supplies deliver 150 Watt going up to 180 Watt with forced air cooling. Additionally, they can deliver 220 Watt peak power for 5s. The EMC characteristic is dedicated for applications in industrial and medical fields. High reliability is provided by using high quality components and an excellent thermal management making the TPP 180-M an ideal solution for industrial and medical devices and for demanding safety and space critical applications.
